

The Nogier Frequencies

The human organism reacts preferentially to stimuli emitted at certain frequencies or associations of frequencies.

The work of Dr Paul Nogier laid the foundations for modern frequency medicine. Methodical and scientific research led him to identify the 7 fundamental frequencies. He then studied the physiological and pathological significance of the variations.

The **Modulo 200 Base** gives you 7 Nogier frequencies (from A to G) and the Universal Frequency U.

It also lets you vary these frequencies, + or -, by 5, 10, 20 or 30%, to adapt the stimulation to your patient..

The therapeutic frequency programmes offer selective bio-stimulation of the patient's reactive capabilities.

Choose the frequency with precision (basic frequency with application of a % variation if necessary), through the diagnosis of the Nogier Pulse or by therapeutic deduction. The frequency information will then mobilise the receptors, which will transmit to the central nervous system. This will start the necessary physiological reactions.

The Dent position shifts the range -35%, for selective action in the oral sphere.

In attenuated emission, with the precision of the frequency, you can be sure of a rigorous diagnosis by taking the Nogier Pulse.

Record your Frequency associations

Your **Modulo 200** lets you store up to **5 programmes**, for automatic application of a personalised series of specific frequencies.

When treating certain pathologies, in particular with local treatment, the association of different Nogier frequencies is synergetic, stimulating additional biological functions. Their automatic successive application as part of a recorded programme makes your treatment easier.

3 basic programmes are included for common indications such as pain (Prog: **Analgesia**), tissue alterations (**Regeneration**) or contractures (**Myorelaxation**).

modulo 200
A long-lasting investment

Confirmed therapeutic value

The **fast results** display a reduction of painful phenomena, an **improvement** of the problems treated, and an **acceleration** of the natural healing process, without side-effects.

modulo 200

Efficient, Modular and Adaptable

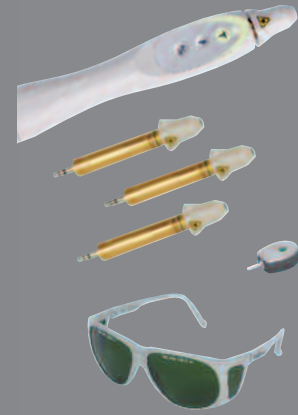

Choose your Modules

Choose Your Treatment

Modulo 200 Base

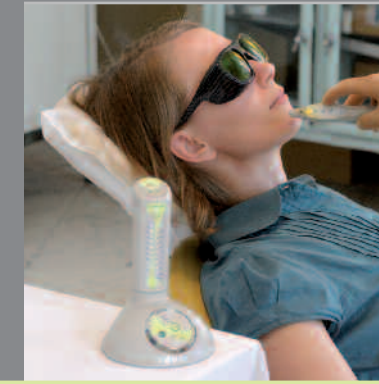

Battery charger

Lasertherapy

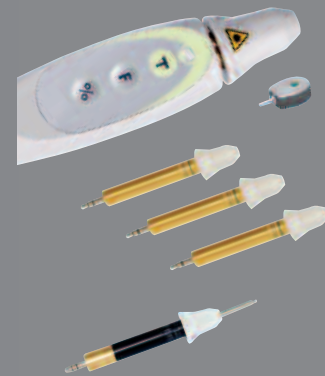

- Pulsed 15W laser module, skin and sensitive areas
- Pulsed 40W laser module, body points
- Pulsed 75W laser module, large muscle or fat masses
- Superpulsed 40W laser module, local treatment
- Protective goggles mandatory for eye protection

Lasertherapy

Personalised treatment for each patient

- Traumatology – Sports medicine
- Joint problems
- Rheumatological affections
- Dermatology – Gynaecology
- Dentistry
- Scarring - Aesthetics

Auricular medicine

- Microlaser Module: auricular medicine
- Infrared light module: Immediate sub-cutaneous
- Red light module: Skin, specific photoreceptors
- White light module: Skin, broad spectrum photoreceptors
- Direct Electric Module: Skin, receptors

Auricular medicine

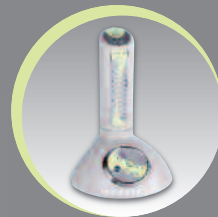

Personalise your treatment

- **make your diagnosis** by taking the **Nogier pulse**, with attenuated stimulation and the accurate selection of the frequency used,
- **provide** treatment with the same precision
- **verify** the positive effect of the treatment, in attenuated emission,

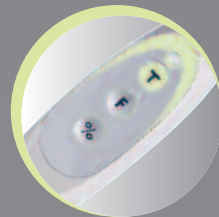

by simply pressing a button on the handset.

Interchangeable module
Simple and quick insertion

Up to 7 hours autonomy
Rechargeable battery

Direct controls
Easy-to-use handset

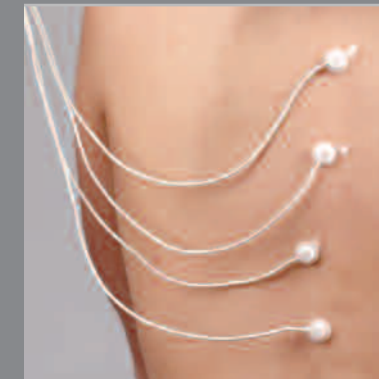

Memory programming
3 programmes included
2 free memories

Therapy by Micro-current

- Direct or Differential Electric Modules, stimulation of a specific point
- Acutrode Module, stimulation of up to 4 points simultaneously
- External Grounding Electrode

Therapy by Micro-current

Apply the benefits of "intelligent" micro-current frequency information

- Acupuncture TEAS (Transcutaneous Electrical Acupuncture Stimulation)
- Auriculartherapy
- Trigger points
- MET (Microcurrent Electrical Therapy)
 - Pain
 - Tissue regeneration
